Objectives

The Carpathian School aims at discussion the role of universities and public organizations in education practitioners, tailoring educational programs to Quadruple Helix Cooperation format and providing environmental services to local communities for achieving the 2030 Sustainable Development Goals.

Given the new geopolitical conditions and numerous reforms announced by the Government of Ukraine, there is a need to realize new perspectives on the sustainable development of Carpathian region and strengthening international environmental cooperation at territorial communities' level.

The Carpathian School provides a platform for local authorities, businesses and communities to collaborate at a professional scientific level on topics related to sustainability of mountain landscapes, integrated management of natural resources and municipal waste operations.

Area of Studies

- Adaptation to climate change;
- Sustainable management of natural resources;
- Feasibility of environmental impact assessment;
- The role of universities in the implementation of modern technologies;
- Strategy for household waste management;
- Sustainable development: educational, cultural and aesthetic features.

The mountain landscapes of today reflect the way society has taken care of it.

The publication of scientific papers is planned in local journal "[Bulletin of Taras Shevchenko National University of Kyiv. GEOGRAPHY](#)"

Participants

We are inviting Master and PhD scholars who are specialized in Earth and Environmental Sciences. We also are welcoming university professors, NGO leaders and Local Government officials who provide and support educational services in the field of sustainable development and land recovery technologies.

Students will be selected on a competitive basis. The selection criteria are a short motivational letter or the Abstract of presentation on one of the above listed thematic directions.

Students will obtain Certificates upon completion their tasks.
